

Divyansh Baghel

Product Designer & UX Engineer

Location: India (Open to Remote / Relocation)
Portfolio: divyanshbaghel.in

Phone: +91 97554 11463
GitHub: github.com/DivineDB

Email: divyanshbaghel456@gmail.com

Professional Summary

Visually driven UX Engineer and Product Designer who treats code as a creative medium to rapidly bring high-fidelity digital experiences to life. Expert at bridging the gap between design systems and production-ready code, leveraging modern AI-augmented development workflows to build, iterate, and deploy high-fidelity interfaces efficiently. Specialized in creating clean information architectures, micro-interactions, and component-driven systems that eliminate user friction in complex workflows.

Active Target Roles: Product Designer • UX Engineer • UI Designer • Founding Product Designer

Core Capabilities

DESIGN & STRATEGY	UI/UX Design, Figma, Rive, Framer, Motion Design, Information Architecture, High-Fidelity Prototyping, Interaction Design (IxD), Design Systems, Usability Heuristics
PROTOTYPING & FE	Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Framer Motion, shadcn/ui, HTML5/CSS3
EXECUTION & WORKFLOW	Rapid Interactive Prototyping, Visual Auditing, High-Velocity AI-Assisted Workflows, Frontend Component Integration

Work Experience

Independent Product Designer & Developer	Jan 2024 – Present
Freelance / Remote	
- Formulated end-to-end design strategies by wireframing high-fidelity mockups in Figma and translating them into production-grade, highly responsive frontends using Next.js and Tailwind CSS. - Audited and systematically overhauled interface architecture for consumer-facing businesses, optimizing layout structures, contrast metrics, and typography to dramatically increase visual scannability. - Reduced interface friction by engineering fluid, motion-driven interaction patterns that heightened user engagement and delivered a unified, premium digital identity across client applications.	

Selected Projects

POS Panel for Local Business	github.com/DivineDB/POS-System	Next.js, TypeScript, PostgreSQL, Tailwind CSS
Product & UI Designer		
- Designed a high-density dashboard layout engineered to reduce cognitive fatigue for retail workers under high-stress conditions, slashing active transaction processing times by 30%. - Mapped comprehensive user flows and implemented Optimistic UI design patterns to ensure zero-latency feedback transitions during checkout sequences. - Maintained rigid design token consistency across transactional interfaces to guarantee readable data layouts across varying screen sizes and store lighting environments.		
Scout – AI-Native Job Intelligence Pipeline	github.com/DivineDB/scout	Groq, Serper.dev, Next.js, TypeScript
Full-Stack & UX Engineer		
- Designed an automated intelligence engine that autonomously crawls raw job data across endpoints and maps listings into distinct, context-aware industry verticals. - Crafted a 1-click optimization workflow driven by LLMs, allowing users to dynamically adapt resume schemas and generate hyper-tailored cover letters in a single interaction state. - Engineered an interactive web dashboard optimized for rapid visual scanning, featuring fluid transition states during large-scale data sorting.		

Education

ITM University	2021 – 2025
Bachelor of Technology (B.Tech) in Computer Science & Engineering
